### Risk and reward profile

#### What does this synthetic indicator mean?

- The calculation of the risk indicator is based on estimated and historical data which may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category shown is not guaranteed to remain unchanged. The sub-fund's risk indicator may shift over time.
- The lowest category of the risk indicator does not mean a risk-free investment.
- The sub-fund Rasmala Investment Funds – Rasmala GCC Fixed Income Fund is classified in category 3 because of its investments in bonds and sukuk issued by GCC countries.
- Your initial investment does not benefit from any guarantee or protection.

#### The risk and reward indicator does not take into account the following:

- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for below investment grade

debt securities, which may also be subject to higher volatility and lower liquidity than investment grade debt securities.

- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimize the effect of currency fluctuations may not always be successful.
- The sub-fund's exposure to a single geographic region, which may be subject to particular political, economic, social and fiscal risks, may cause the sub-fund to be more volatile than broadly diversified funds.
- Emerging markets may be subject to increased risks, including less developed custody, legal regulation and settlement practices, greater economic and political instability, higher volatility and lower liquidity than non-emerging market securities.
- Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative instrument.
- It might be that an organization with which the fund trades assets or derivatives may be unable to fulfil its obligations, which could cause losses to the sub-fund.
- Failure or deficient processes, systems and controls, human error or catastrophic events may lead to important losses.

Full information on the risks applicable to the sub-fund is detailed in the prospectus.
